Survey among German start-up entrepreneurs:

- Only a minority of them used creativity techniques for generating new business models.
- 2.2 people on average were involved in idea generation

(Siemon, D., Narani, S.K., Ostermeier, K., Robra-Bissantz, S.: Creativity and entrepreneurship - the role of creativity support systems for start-ups. In: 10th Mediterranean Conference on Information Systems, 2016)

Maybe the Best Solution

- Do we actually need the existing business process?
- Which new processes / business models are possible?
- Do we have any improvement potential by combining processes (for example by exchanging data between them) instead of discussing them separately?

The Practice

- Experience from a workshop (ZuGPM 2020)

Speaking about Ideality...

- Ideal Result - everyone understood very well and likes the approach; no further questions necessary.
- But just in case...
